

# OFFICE PEGBOARD SYSTEM

WORKSPACES THAT PIVOT AS FAST AS YOUR BUSINESS.

For office interiors, myWall® provides a sophisticated, high-performance solution that transforms static walls into adaptive workspaces. Crafted from premium American made Baltic Birch, the system offers exceptional load-bearing strength, allowing for the tool-free mounting of everything from integrated desks and monitors to whiteboards and storage baskets. Its modular design enables offices to stay fluid, shifting instantly from private workstations to collaborative brainstorming zones as team needs evolve. By moving essential tools and tech off the floor and onto a clean, professional vertical system, myWall® maximizes square footage while creating an organized, inspiring environment that reflects a modern corporate culture.

Pin Hole Depth: 52mm  
Weight: 23 kilogram  
Distance between holes: 120mm  
**(custom panel sizes available)**

With Baltic Birch material, myWall® achieves an unmatched level of structural integrity. Unlike traditional materials that rely on soft fillers, Baltic Birch is composed of cross-banded solid hardwood layers, resulting in a dense, void-free core with exceptional load-bearing strength and superior mounting power. This high-grade construction ensures your wall remains dimensionally stable and resistant to warping, while the attractive, multi-layered edges provide a clean, modern aesthetic that reflects the precision and quality of US-based fabrication.

## Baltic Birch

Finishes:  
Veneer (Clear / Stain / Paint)  
Laminate (Formica / Wilsonart)

**Colors**
