

LAB

myWall® brings high-capacity vertical organization to medical and science labs, where floor space and quick access are critical. Made in the USA from premium Baltic Birch, our high-strength modular panels allow lab technicians to clear workstations by mounting equipment, monitors, and storage bins securely on the wall. With its adaptable design, you can instantly reconfigure testing stations and keep vital instruments, tech, and supplies perfectly organized, safe, and within arm's reach.

PRODUCT DETAILS

Colors

myWall panels are available in standard natural and whitewash color. (custom colors available upon request)

Pins / Locking Pins

Pins are available in either locking or non-locking versions with multiple length options.
